

Passionate about working with data and pursuing a Data Science career. I'm fascinated about how it can translate complicated quantitative work into information that the business can understand and take action on. With a background in System Implementation and Programming, my have always been interested in learning new technologies, tools and approaches to find business insights. Now, with so much data available, I have decided to change careers and pursue my interest in Data Science.

Office Clerk 2017 - 2011

Sydney Waste Services, Sydney

Manage complete data entry and customer support functions including answering telephone and email enquiries in a timely manner.

System Implementer & Programmer

2007 - 200

Mannasoft Technology Corporation, Philippines

I started out as a System Implementer where I handled the testing and implementation of Timekeeping and Payroll systems. After several months, I was promoted to Programmer where I was in charge of customisation of the timekeeping system.

PROJECTS

The following is a summary of my projects from General Assembly. Please visit my GitHub and blog for more information regarding my other projects

Capstone Project - Predicted future population using data from Census Australia and made Sentiment Analysis like Most Talkabout, Positive & Negative Reviews and Topic Modelling, from scraping Google Reviews of salons around target areas of a business client who wants to open a hair dressing salon.

Job Market Analysis - Scraped Data related jobs of Indeed websites to analyse which features contributed on predicting salary. This project consists of testing the three major skills: collecting data by scraping a website, using natural language processing, and building a binary classifier.

House Price Prediction - Predicted sales prices and practice feature engineering using kaggle's Ames Housing dataset. Used statistical analysis to optimize investment and maximize return

SKILLS & PROGRAMMING LANGUAGES

Python Tableau Data Analysis
SQL AWS Predictive Modelling
Java Microsoft SQL Server Web Scraping
HTML/CSS Microsoft Excel Natural Language Processing
